

Acta Virologica is an international journal of predominantly molecular and cellular virology. It provides means for rapid publication of original papers dealing with fundamental research mainly on human, animal and plant viruses. As a matter of tradition also rickettsiae are included.

Areas of interest are structure, genetics and morphology of viruses, molecular biology of virus-cell interactions, pathogenesis of viral diseases, viral immunology, vaccines, antiviral drugs and viral diagnostics.Original experimental papers may have the form of full-length articles, short communications or letters to the editor. Besides them also review articles, book reviews, announcements and reports on various scientific events are accepted. Science Citation Index:

Impact Factor = 1.82

Important notice for authors:

Journal Acta virologica will launch as a Gold Open Access journal starting this spring. Unfortunately, this is accompanied by higher processing costs and, therefore, a new article processing charge (APC) will be imposed on all accepted papers. APC will be payable for all manuscripts submitted after April 3rd, 2023.

The APCs will be 1950 EUR for full papers and reviews and 1000 EUR for short papers and minireviews.

Dear Authors.

Starting on April 5, 2023, submission of manuscripts for Acta Virologica will be handled through a new website:

https://www.frontierspartnerships.org/journals/acta-virologica

As of May 1st, 2023, Acta Virologica will be published with a new publisher, Frontiers, in the gold open access mode.
We decided on this change with the thought of improving our journal and enabling wider-public dissemination of Acta Virologica and your publications.

We hope to meet you on the new platform.
